

YASHVI KAUSHIK

yashvikaushik2525@gmail.com | +91-7505788029 | LinkedIn | GitHub | Delhi, India

Professional Summary

Computer Science Engineering (Artificial Intelligence & Machine Learning) student with hands-on experience in back-end and full-stack development, building RESTful APIs, real-time web applications, and database-driven systems using Node.js, Express.js, MongoDB, and FastAPI. Familiar with AI-powered application development using LangChain and OpenAI APIs, with a strong interest in scalable backend architecture, software engineering, and intelligent web applications.

Technical Skills

Languages: C++, Java, Python, JavaScript, TypeScript

Backend: Node.js, Express.js, FastAPI, REST APIs, Firebase Admin SDK, EJS

Frontend: HTML5, CSS3, Vanilla JavaScript

Databases: MongoDB Atlas, MySQL, Firebase Firestore, TypeORM

Tools: Git, GitHub, Postman, Swagger, Thunder Client, VS Code

Core CS: Data Structures & Algorithms, OOP, DBMS

AI: LangChain, OpenAI API, Machine Learning, RAG

Education

Bennett University, B.Tech Computer Science Engineering

2024–2028

CGPA: 9.34/10 (Till 4th Semester)

Projects

OpenChat

GitHub

Node.js — Express.js — Socket.IO — MongoDB — Firebase Authentication

- Built a real-time public chat application with room-based messaging using Socket.IO, enabling seamless bidirectional communication.
- Developed RESTful APIs for room management, message persistence, and database operations using Express.js and MongoDB.
- Implemented secure Google Sign-In using Firebase Authentication and verified Firebase ID tokens on the backend using Firebase Admin SDK to protect REST APIs and authenticated Socket.IO connections.
- application to be deployed using Vercel and Render with a scalable backend architecture and secure Firebase Authentication.

Productivity Dashboard

HTML5 — CSS3 — JavaScript — Node.js — Express.js — REST APIs

- Built a full-stack productivity dashboard featuring task management and responsive user interactions.
- Integrated REST APIs and asynchronous JavaScript to perform CRUD operations and dynamic data updates.

Weather WhatsApp Chatbot

GitHub

Python — FastAPI — Twilio API — OpenWeather API — Postman

- Developed a WhatsApp chatbot that delivers real-time weather information using Twilio and FastAPI.
- Integrated the OpenWeather API and tested REST endpoints with Postman for reliable request handling.

Certifications & Achievements

- **Software Engineering** – SWAYAM (NPTEL), Government of India
- **Top 5 Finalist** – Hackaccino Hackathon 2026 (150+ Teams)

Position of Responsibility

Head – Corporate & Alumni Relations

Dean's Career Cloud, Bennett University

Managed corporate outreach and alumni engagement while coordinating industry-academia events.
